

Dr. Hyosan Lee

(Samsung Electronics, Republic of Korea)

Dr. Lee is Master of Technology in Process Development at Samsung Electronics since 2020.

He received the Ph.D. in the department of Chemistry from Korea Advanced Institute of Science and Technology (KAIST), Korea in 2002. Thereafter he joined to Samsung Electronics, Semiconductor R&D Center, where he worked to develop cleaning process, equipment, and material.

Dr. Lee's current research mainly focuses on the 'Wet Material' which is used in Cleaning/CMP process. Explorations for advanced wet material are actively carried out with highly deliberated chemical design and engineering.
