

Dr. Dongwon Choi

Head of DRAM CVD

R&D Process / Thin Film Process

SK Hynix, Korea

Since 2019, he has been with R&D Process at SK Hynix, where he is currently leading the development of dielectric thin film processes for DRAM. Previously he worked on the development of a wide range of metal and dielectric thin film deposition and assembly processes at Intel, Applied Materials, and Lam Research. He holds a Ph.D. in Materials Science and Engineering from Massachusetts Institute of Technology (MIT).
